

Effortlessly Scale TPRM Across Customer Tenants

Traditional TPRM is fundamentally broken for Managed Security Service Providers. Relying on static spreadsheets and reactive questionnaires limits your margins, bottlenecks onboarding, and fails to scale.

SAFE One for MSSPs introduces the industry’s first Agentic AI-driven, multi-tenant TPRM platform. Built on an Agentic Workflow Engine, it empowers MSSPs to scale risk management services to thousands of vendors without growing analyst headcount.

The Multi-Tenant TPRM Platform Built for MSSPs

MSSPs are being asked to deliver more than point-in-time vendor assessments. Customers now expect continuous third-party risk visibility, faster assessments, ongoing monitoring, and measurable risk reduction – without the delays and overhead of manual TPRM programs.

With SAFE One, MSSPs can:

- Scale customers without scaling headcount
- Manage every customer tenant from one unified view
- Standardize delivery while supporting bespoke programs
- Automate assessments, monitoring, and remediation
- Deliver continuous, business impact-driven TPRM services

Why SAFE TPRM?

- Intelligent Intake Powered by 60M+ Companies**
Validates every input, enrich missing context, and calculate inherent risk instantly, so every vendor enters the right process at the right risk level
- Zero-Touch Due Diligence**
Automates vendor engagement by collecting, reviewing, and resolving responses, eliminating analyst effort and endless back-and-forth
- Goal-Oriented Remediation**
Identifies material gaps and autonomously works with vendors through verified closure; provides remediation guidance, follows up on open actions, and more
- Continuous Monitoring Across Five Dimensions**
Correlate outside-in data, questionnaires, documents, contracts, and threat intelligence from internal and public sources for an always-current view of vendors
- Zero-Residual-Risk Offboarding**
Leverages 20+ automated, out-of-the-box workflows to close every obligation, making every vendor exit audit-ready and risk-free

TRUSTED BY INDUSTRY LEADERS

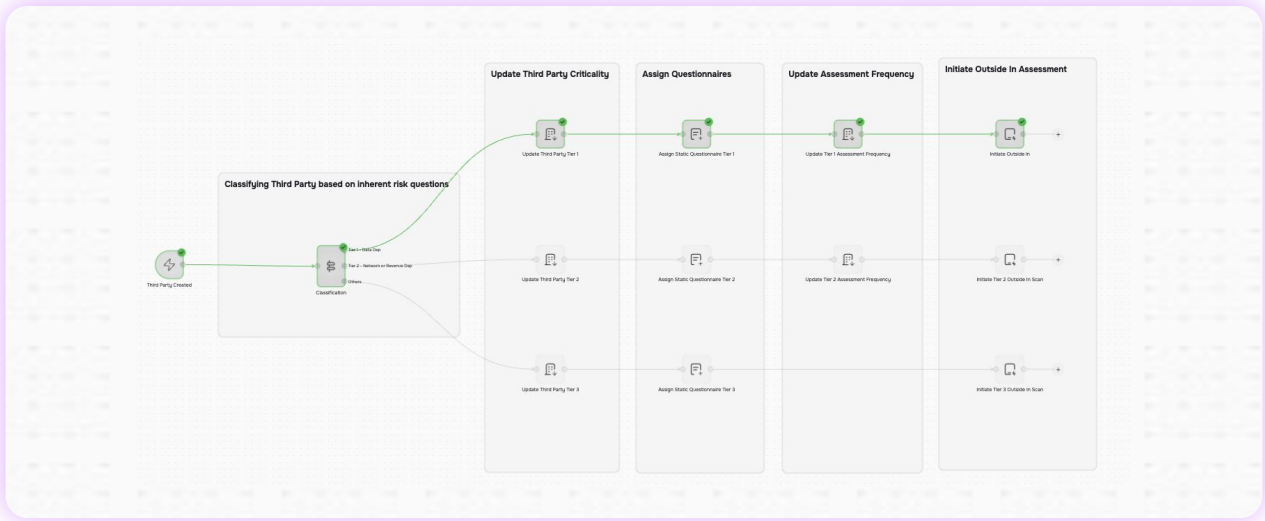

Legacy TPRM MSSP Challenges	The SAFE TPRM MSSP Advantages
Fragmented customer programs	Single tenant view across every customer
Slow tenant setup	Faster onboarding and offboarding workflows
Data isolation concerns	Strict customer-level data segregation
Inconsistent service delivery	Standardized assessments and workflows at scale
Manual analyst overload	Exception-led TPRM operations
Limited portfolio visibility	Cross-tenant risk and performance benchmarking
Difficult to prove value	Business impact-driven vendor prioritization

Core Capabilities: TPRM AI Co-Worker to Scale Customer TPRM Programs

SAFE TPRM works as an AI Co-Worker that orchestrates 100+ specialized AI Agents to execute tasks across every phase of the TPRM lifecycle. It validates intake, runs assessments, analyzes evidence, follows up with vendors, monitors change, coordinates remediation, and verifies offboarding, all within your policies and approval boundaries. Agentic workflows can run on demand, on a schedule, or be customized around your vendor tiers, risk policies, and business processes. This gives teams a flexible, continuously operating TPRM program that scales without proportional headcount. With SAFE TPRM's AI Co-Worker you enable:

- Zero-effort TPRM operations
- 100% automated and scalable assessments
- AI-Powered TPRM scaling

Agentic Workflow: Auto-Tier Third Parties Upon Onboarding

SAFE TPRM AI Co-Worker Use Cases

- 01 | Intake:** Intelligent Intake that validates every input, enriches missing context, calculates inherent risk instantly, based on data from 60M+ companies.
- 02 | Due Diligence:** Zero-Touch Due Diligence that works directly with vendors to collect, review, and resolve responses, eliminating analyst effort and endless back-and-forth.
- 03 | Remediation:** Ensure goal-oriented Identification of gaps and Agentic AI workflows autonomously close the loop with third parties.
- 04 | Continuous Monitoring:** continuously correlates outside-in intelligence, questionnaires, documents, contracts, and threat intelligence from internal and public sources to deliver the most comprehensive, always-current view of vendors.
- 05 | Off-boarding:** Zero residual risk - powered by 20+ automated offboarding workflows that make every vendor exit audit-ready.

SAFE TPRM for MSSPs combines secure multi-tenant architecture, single tenant visibility, centralized workflow management, and autonomous third-party risk management capabilities – helping partners scale managed TPRM services with speed, consistency, and trust.
