

SAFE One: Autonomous Exposure Management with Agentic Workflows

In the AI era, exposures and cyber risk are growing faster than legacy processes can keep up. Manual assessments, static reports, and fragmented tools cannot scale across enterprise assets, third parties, and AI exposure. Enterprises need to fight AI-driven risk with AI-powered cyber risk management.

SAFE One is built for this shift – giving enterprises a unified way to manage exposures across their internal environment, AI ecosystem, and third-party landscape.

SAFE One: The Leader in Autonomous Cyber Risk Management

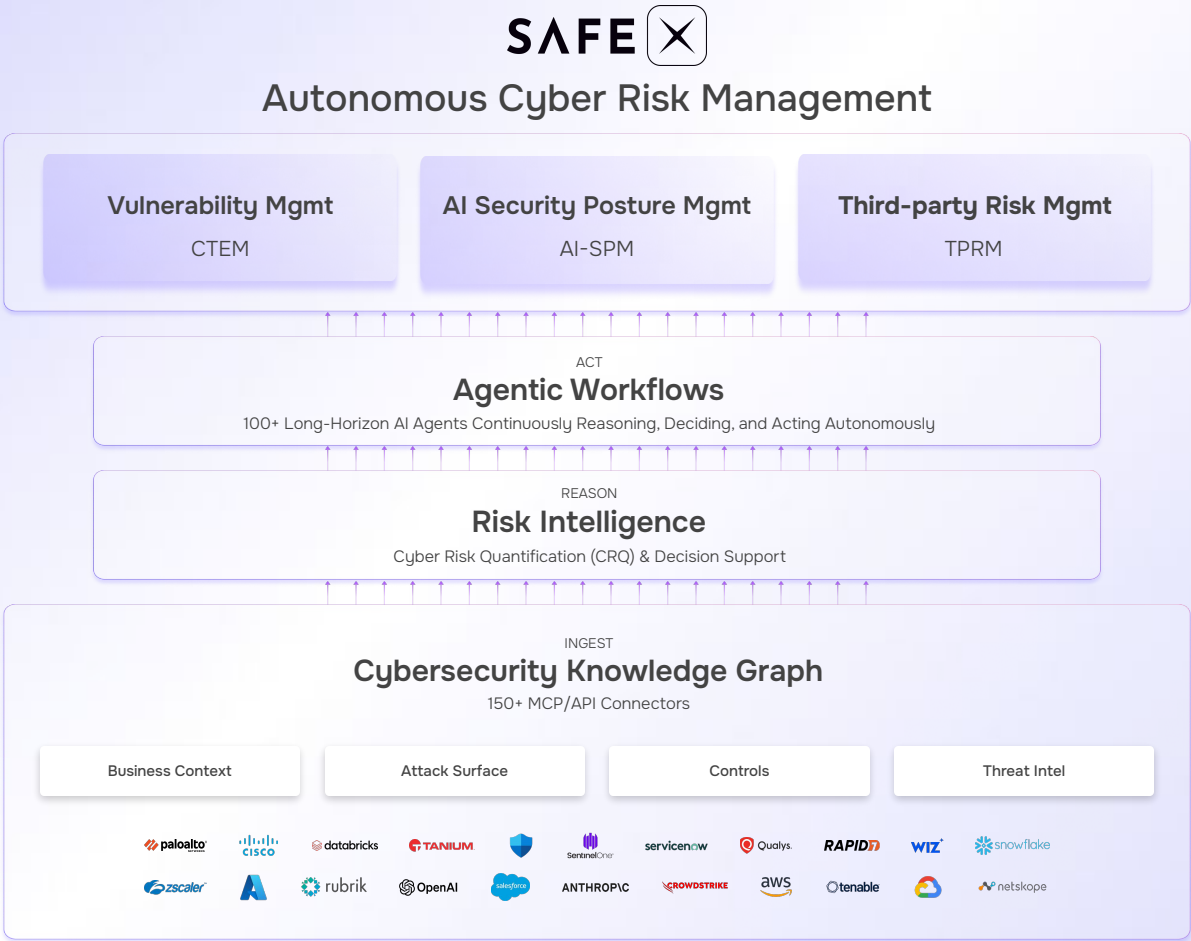

SAFE One brings Third-Party Risk Management (TPRM), Continuous Threat Exposure Management (CTEM), AI Security Posture Management (AI-SPM), and Cyber Risk Quantification (CRQ) into one autonomous cyber risk management platform. Powered by an Agentic Workflow Engine and 100+ AI Agents, SAFE continuously connects control data, threat intelligence, and business context to deliver personalized insights, board-ready reporting, and ROI-driven remediation guidance.

The SAFE One includes:

- **SAFE TPRM** to manage vendor exposures
- **SAFE CTEM** to manage operational exposures
- **SAFE AI-SPM** to manage AI exposures
- **SAFE CRQ** to manage strategic exposures

Why SAFE Wins?

- **Unified Exposure Management**
Single platform for TPRM, CTEM, AI-SPM, and CRQ to help manage exposures across enterprise operations, vendors, and AI.
- **Autonomous Cyber Risk Management**
SAFE One uses an Agentic Workflow Engine and 100+ AI Agents that continuously discover, prioritize, remediate, and validate risk
- **Cybersecurity Super-Intelligence**
Leverage an autonomous reasoning layer that transforms cybersecurity data into insights and actions to mitigate risk in efficiently
- **Business Risk-Driven Intelligence**
Industry-leading Cyber Risk Quantification (CRQ) as your system of intelligence to prioritize actions across your enterprise and third parties
- **Accuracy & Credibility that Cyber Insurers Trust**
SAFE is trusted by global brokers and underwriters enabling customers to get superior insurance coverage at discounted premiums

SAFE CRQ	SAFE CRQ is the category leader, and built upon AI-first foundations. SAFE empowers CISOs to know and understand cyber risk, strategically prioritize investments based on ROI, and efficiently report and communicate with the Board and Regulators
SAFE CTEM	SAFE CTEM is the industry's first autonomous platform that connects exposures directly to business risk. It shifts security teams from manually collecting findings to autonomously prioritizing and remediating the most critical exposures first
SAFE TPRM	SAFE TPRM is the only 100% autonomous TPRM platform powered by Agentic AI. It delivers a unified platform to manage the entire TPRM lifecycle, coverage at scale without adding headcount, and zero-effort vendor interactions
SAFE AI-SPM	SAFE AI-SPM is a unique approach to manage AI exposure across environments by monitoring AI vendors, live activity, configurations, outside-in posture, questionnaires, contracts, and conflicting signals across these core areas
